## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 8/20/07 has been entered.

### ***Election/Restrictions***

Claims 12-15 remain withdrawn from further consideration pursuant to 37 CFR 1.142(b), as being drawn to a nonelected invention, there being no allowable generic or linking claim. Applicant timely traversed the restriction (election) requirement in the reply filed on 9/13/2006.

### ***Claim Objections***

Claims 1, 7, and 20 are objected to because of the following informalities: These claims contain underlines that appear to be typographical errors. See claim 1 “active\_monomeric” and “body\_using” and claim 7 “isoelectric\_precipitation.” Claim 20 recites “SEQ DI” rather than “SEQ ID.” Appropriate correction is required.

### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Art Unit: 1647

Claims 18-20 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. This is a new matter rejection.

Claim 18 was added in the amendment filed 1/5/07. Claims 19-20 were added in the amendment filed 1/19/07. These claims have been subsequently amended.

The originally filed specification and claims do not appear to contemplate a process of obtaining a solution containing a purified refolded biologically active monomeric bone morphogenetic factor, wherein said solution is free from oligomeric side products having the steps set forth in the claims. Applicant has not pointed out basis by page and line number for all limitations of these claims and no basis is apparent.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 17 and 20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

These claims recite “factor is a polypeptide **as set forth** in SEQ ID NO: 1” (emphasis added). This is confusing because the claim could be interpreted as being directed to subsequences of SEQ ID NO: 1. This does not appear to be applicant’s intent and is not contemplated by the specification. It appears that these claims should read “factor is a

Art Unit: 1647

polypeptide comprising SEQ ID NO: 1” to make clear that the complete sequence of SEQ ID NO: 1 is a limitation of the claims.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-8 and 16-20 are rejected under 35 U.S.C. 103(a) as being obvious over Andou et al. (U.S. Patent No. 6,551,801) in view of Hotten et al. (U.S. Patent No. 6,972,321).

This rejection is maintained for reasons of record.

As set forth in the Advisory Action mailed 7/11/07, applicant has argued that Andou et al. is disqualified as prior art; however, they have provided no evidence in support of this assertion. Applicant is directed to MPEP 2146 and 706.02(l)(1).

The presently claimed subject matter is not found in any of the parent applications except 10/414,954, filed 4/16/03. No other prior application teaches all limitations of the claims. As such, the effective filing date of the instant application is 4/16/03. Both Andou et al. and Hotten et al. are by other as the inventive entities are not identical to that of the instant application.
